

Home Dialysis Class

Help your patients understand PD and HHD

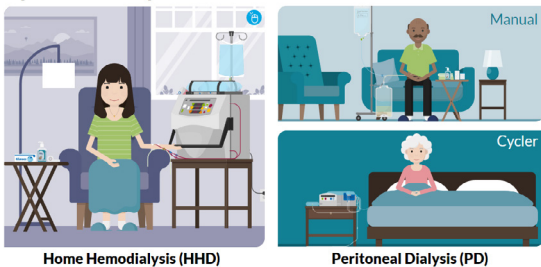

Kidney Smart® Home Edition is a new patient education offering designed to help patients understand home modalities. The PD or HHD focused curriculum is delivered by a trained instructor and has dynamic videos, patient testimonials, and a hands-on portion to ensure the patient leaves knowing if either treatment is right for them.

Your patients will learn...

- What PD or HHD are, how they work and the access required to start
- How they can be a successful home patient and how the therapy can fit into their lifestyle

Options for Dialysis at Home

Home Hemodialysis (HHD)

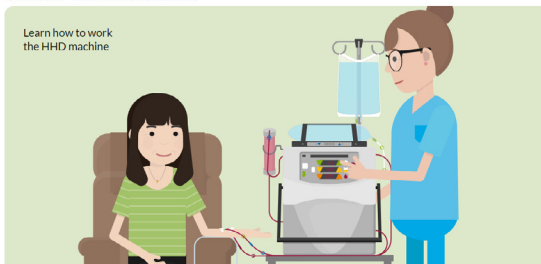

Peritoneal Dialysis (PD)

Hands-On Simulation

Learn how a PD catheter feels using the PD apron

Hands-On Simulation

Learn how to work the HHD machine

Which patients should attend?

- Patients with progressing CKD needing to make a treatment decision soon
- Previously educated patients who are candidates for home modalities or would like to learn more
- Late-stage participant who attended a general Kidney Smart class and expressed interest in a home modality

How can you recommend patients?

Select HHD or PD in your Kidney Smart recommendation process (KidneySmart.org/recommend, EHR or Efax form) or simply include a note in the recommendation.
