

Our Community Care website and the reports available on or linked from that website contain statements that are forward-looking statements within the meaning of the federal securities laws. These forward-looking statements include, without limitation, our goals and disclosures related to environmental, social and governance (ESG) matters and belonging, such as the percentage of our patients choosing to dialyze at home and our future renewable energy use, carbon emissions and water use. All statements on our Community Care website and related reports, other than statements of historical fact, are forward-looking statements. Without limiting the foregoing, statements including the words “expect,” “intend,” “will,” “target,” “goal” and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based on DaVita’s goals and aspirations as of February 13, 2026, and it may be difficult to achieve many of the Company’s ESG goals during the desired timeframes or at all. DaVita undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of changed circumstances, new information, future events or otherwise, except as may be required by law. Actual future events and results could differ materially from any forward-looking statements due to numerous factors that involve substantial known and unknown risks and uncertainties. These risks and uncertainties include, among other things:

- evolving regulatory requirements affecting ESG standards, measurements and reporting requirements;
- external conditions, including those related to general economic, political and global health conditions, including without limitation, the impact of global events and political or governmental volatility; the impact of the domestic political environment and related developments on the current healthcare marketplace, our patients and on our business, including without limitation, developments related to domestic policy initiatives and guidance or potential government shutdowns; the continuing impact of infectious diseases on our financial condition and the chronic kidney disease population and our patient population; supply chain challenges and disruptions, including without limitation with respect to certain key services, critical clinical supplies and equipment we obtain from third parties, and including any impacts on our supply chain and cost of supplies as a result of natural disasters or evolving trade policies, including tariffs; the potential impact on our patients and industry of new or potential entrants in the dialysis and pre-dialysis marketplace and innovative technologies, drugs or other treatments; elevated teammate turnover or labor costs; the impact of continued increased competition from dialysis providers and others; and our ability to respond to challenging U.S. and global economic and marketplace conditions, including, among other things, our ability to successfully identify cost saving opportunities;
- our ability to successfully implement strategic and operational initiatives in a complex, evolving and highly regulated environment, including, without limitation, with respect to integrated kidney care and value-based care initiatives and home-based dialysis;
- our ability to attract, retain and motivate teammates, including key leadership personnel, and our ability to manage potential disruptions to our business and operations, including potential work stoppages, operating cost increases or productivity decreases whether due to union organizing activities, political unrest or legislative or other changes, demand for labor, volatility and uncertainty in the labor market, the current challenging and highly competitive labor market conditions, including due to the ongoing nationwide shortage of skilled clinical personnel, or other reasons;
- legal and compliance risks, such as compliance with complex, and at times, evolving government regulations and requirements, and with additional laws that may apply to our operations as we expand geographically or enter into new lines of business;
- our ability to develop and maintain relationships with physicians and hospitals, changing affiliation models for physicians, and the emergence of new models of care or other initiatives that, among other things, may erode our patient base and impact reimbursement rates;
- the effects on us or others of natural or other disasters, public health crises or severe adverse weather events such as hurricanes, earthquakes, fires or flooding;
- the other risks factors, trends and uncertainties set forth in DaVita Inc.’s Annual Report on Form 10-K for the year ended December 31, 2025, and the risks and uncertainties discussed in any subsequent reports that DaVita files or furnishes with the Securities and Exchange Commission from time to time.
