California Voluntary Carbon Market Disclosures Act (VCMDA) Disclosures

DaVita Inc. ("DaVita" or "the Company") is committed to responsible business, including improving our business operations to lessen our impact on both the local and global environment. We strive to be a community first and a company second, which is underscored by our Trilogy of Care - Caring for Our Patients, Caring for Each Other and Caring for Our World. While it takes many factors to successfully achieve this commitment, DaVita recognizes transparency is an essential element. The VCMDA requires businesses that make claims regarding achieving significant reduction in its greenhouse gases within the state to disclose key information to support its claims.

The following is a summary of statements regarding net-zero emissions reduction made by the Company. We refer you to our Community Care Report for more information.

- Science Based Targets initiative (SBTi) verified commitments:
    - Reduce absolute scope 1 and 2 (operational) greenhouse gas (GHG) emissions 50% by 2030 from a 2018 base year. DaVita achieved that goal in 2025.
    - Increase annual sourcing of renewable electricity from 0% in 2018 to 100% by 2030. DaVita achieved that goal in 2025.
    - 70% of suppliers by emissions covering purchased goods and services, capital goods, waste generated in operations, and downstream transportation and distribution set science-based targets by 2025. DaVita achieved that goal in 2025.
- DaVita has committed to net zero scope 1 and 2 emissions by 2050.

Management regularly tracks progress towards the above goals and reports its progress annually in the Company's Community Care Report, which is available for download here. It includes the latest updates on GHG emission reductions. DaVita measures its emissions in alignment with the GHG Protocol. Emissions data is reviewed by a third party, who provides limited assurance that the emissions inventory are verifiable and meet the requirements of the CDP. See their limited assurance report on DaVita's ESG Reporting Hub.

DaVita follows the Healthcare Providers and Services, and Healthcare Technology section in setting and measuring its science-based targets. A review by the Science Based Targets initiative (SBTi) verified our climate targets are in line with the scale of reductions required to keep global warming from rising more than 1.5 degrees Celsius from pre-industrial levels.

About DaVita Inc.

DaVita (NYSE: DVA) is a health care provider focused on transforming care delivery to improve quality of life for patients globally. The company is one of the largest providers of kidney care services in the U.S. and has been a leader in clinical quality and innovation for more than 20 years. DaVita cares for patients at every stage and setting along their kidney health journey—from slowing the progression of kidney disease to helping to support transplantation, from acute hospital care to dialysis at home. DaVita has reduced hospitalizations, improved mortality, and worked collaboratively to propel the kidney care industry to adopt an equitable and high-quality standard of care for all patients, everywhere. Forward Looking Statements

This disclosure, as well as the websites linked to herein, contain statements that are forward-looking statements within the meaning of the federal securities laws. Without limiting the foregoing, statements including the words "expect," "intend," "will," "target," "goal" and similar expressions are intended to identify forward-looking statements. These forward-looking statements could include, among other things, statements about our goals and aspirations related to environmental, social and governance (ESG) matters, such as the percentage of our patients choosing to dialyze at home and our future renewable energy use, carbon emissions and water use.

Certain of these forward-looking statements are based on DaVita's goals and aspirations as of the date such statements were made and it may be difficult to achieve many of the Company's ESG goals during the desired timeframes or at all. DaVita undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of changed circumstances, new information, future events or otherwise, except as may be required by law. Actual future events could differ materially from any forward-looking statements due to numerous factors that involve substantial known and unknown risks and uncertainties. These risks and uncertainties include, among other things: evolving regulatory requirements affecting ESG standards, measurements and reporting; and the other risk factors, trends and uncertainties set forth in our Annual Report on Form 10-K for the year ended December 31, 2025 and subsequent quarterly reports on Form 10-Q, and the risks and uncertainties discussed in any subsequent reports that we file or furnish with the U.S. Securities and Exchange Commission from time to time.
